

## **Council 21<sup>st</sup> September 2015**

### **Question from a member of the Public**

From Mr D Newman:

Can the council update regarding parking in Mount Pleasant. When the TV cameras were on the estate promising a resolution in the next couple of weeks. This has never materialised and we are in the same position.

The residents demand a resolution to the issue and I for one would welcome residents parking permits.

It is noted adjoining roads to Mount Pleasant such as Oakly Road have double sided parking, and the only assumption for Mount Pleasant not having double sided parking for residents is the amount of traffic we take.

I feel the road would benefit for a trial of becoming a one way road, as the bottom of Mount Pleasant is a no entry for cars anyway.

What can the council do to canvas opinion of residents about the future of the road going forward, or if required I would canvas the estate for proposals.

The problem cannot go on indefinitely, and this road was not made for the amount of traffic going up and down it. If a resolution is not forthcoming the residents will have to look to take objection to the council's lack of support, by blocking the entrances to the estate.
