Conclusion

In summary:

- Only 6% of questionnaires responses were received
- The majority of the responses received (55%) indicated they would not want a chargeable communal cleaning service introduced to their block of flats
- The majority of the responses received (47%) felt fortnightly cleaning would be the preferred frequency.
- The majority of responses received (62%) indicated that they would be willing to pay £3.00 per week for a cleaning service.

The Winyates area had the highest response rate; this may be due to other consultation that has been undertaken in the area recently on improvement works. Customers may be encouraged to voice their opinions from seeing how consultation has had a direct affect on outcomes in the community.

For Council Housing the Tenant Services Authority is driving change in the way standards are being decided across service delivery, encouraging landlords to introduce local standards that are relevant by area ensuring that decisions result from involvement and customers expressing opinions.

Due to the low response rate across all of the area's it may be beneficial to carry out further consultation work at a more local level. It may be relevant to consider local agreements to either an area such as Winyates or even for individual blocks of flats.

In conclusion due to the low response rate it may indicate:

- further methods of consultation may be required at a more local level.
- lack of interest in introducing this type of service
