## Grant of Planning Permission subject to Section 106 Agreement

---

<b>APPLICATION:</b>	19/00977/HYB
<b>LOCATION:</b>	Land At Brockhill East, Weights Lane, Redditch, Worcestershire
<b>PROPOSAL:</b>	Hybrid planning application for up to 960 dwellings consisting of a full application for 128 dwellings accessed off Weights Lane, new public open space, drainage system, engineering operations and associated works and an outline application for the construction of the remaining dwellings with access points off Cookridge Close, Hawling Street and Weights Lane and including a new District Centre, new play facilities, new highway network, public open space, new drainage system and surface water attenuation, engineering operations and all associated works including landscaping.
<b>DECISION DATE:</b>	1st November 2021

---

Redditch Borough Council as the Local Planning Authority grants planning permission subject to section 106 agreement in accordance with the Town and Country Planning Act 1990 and The Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended) for the proposal described above. This permission is subject to conditions which must be complied with and are set out below:

### **Conditions**

- 1) With the exception of Phase 3 (approved in full as part of this permission - 128 dwellings accessed off Weights Lane, new public open space, drainage system, engineering operations associated works) a detailed phasing plan for the development shall be submitted to and approved in writing by the local planning authority prior to the submission of the first reserved matters application. The phasing plan shall specify the proposed timing for delivery of the housing and other build elements of the development. Any subsequent amendment to the phasing of the development shall be submitted in the form of a revised phasing plan to the Local Planning Authority for approval in writing and the development shall be carried out in accordance with the approved revised details. The development shall be carried out in accordance with the approved details, unless otherwise approved in writing by the Local Planning Authority.

Reason: In order to secure a satisfactory delivery of development.

- 2) No development shall commence on any part of the development other than works specified in Phase 3 (128 dwellings accessed off Weights Lane, new public open space, drainage system, engineering operations associated works) until all of the following reserved matters for each separate development phase of the development, have been submitted to and approved by the Local Planning Authority: (1) Appearance (2) Landscaping (3) Layout (4) Scale (5) Access (internal estate roads). An application for approval of reserved matters for all phases of the development must be made to the Local Planning Authority not later than the expiration of Ten (10) years beginning with the date of the grant of hybrid planning permission.

Reason: To comply with Article 5 of the Town and Country Planning (Development Management Procedure) (England) Order 2015 (or any Order revoking and re-enacting that Order) and to ensure a comprehensive layout in the interests of proper planning of the area and to allow sufficient time to attract future occupiers. To comply with the provisions of Section 92 of the Town and Country Planning Act, 1990 (as amended by Section 51 of the Planning and Compulsory Purchase Act 2002).

- 3) Unless otherwise approved in writing by the Local Planning Authority, the development of Phase 3 (128 dwellings accessed off Weights Lane, new public open space, drainage system, engineering operations associated works) shall be begun within 18 months of the date of this permission. Each subsequent phase of the development hereby permitted shall be begun within three (3) years of the date of approval of the last of the reserved matters to be approved for that phase.

Reason: To prevent the accumulation of unimplemented planning permissions and in accordance with the requirements of Section 51 of the Planning and Compulsory Purchase Act 2004.

- 4) The development hereby permitted shall be carried out in accordance with the following approved plans and particulars:

Hybrid Scheme:

- P-01Rev C - Location Plan
- 8506-L-02 RevJ Framework Plan
- DAS RevB

Full Element:

- P-02 Scheme Proposals Phase 3 Rev V
- P-03 Rev-B External Materials
- P-04 Rev D - Affordable Housing Plan
- P-05 Rev D - Tenure Plan
- P-06 Rev E - Storey Heights Plan
- P-08 Rev A- Gas Main Plan
- P-H-01 Corfe
- P-H-02 Himbleton
- P-H-03 Leicester
- P-H-04 Clayton
- P-H-05 Hatfield
- P-H-06 Hanbury
- P-H-07 Alnwick
- P-H-14 Clayton Corner
- P-H-17 Dalby

- P-H-18 Lumley
- P-H-19 Gisburn
- P-H-08 HQI 65
- P-H-09 HQI 79
- P-H-10 HQI 84
- P-H-11 HQI 73
- P-H-12 HQI 60
- P-H-13 HQI 50
- P-H-15 HQI 114
- P-H-16 HQI 83
- PS-01 Rev A Pumping Station
- GG-01 Rev A Gas Governor
- SS-01 Sub Station

Technical Drawings:

- FRA - 19039 Drainage Strategy - Sheet 1A & Sheet 2A
- 2809-12-P4 Dagnell End Road -GA
- 2809-TR-03-06 Highway Improvements Access

Reason: To define the permission and in order to secure the satisfactory delivery of the development.

- 5) The total number of dwellings authorised by this permission shall not exceed 960.

Reason: In order to secure a well planned development.

- 6) The submission of all Reserved Matters and the phased implementation of the development shall be in substantial accordance with the Framework Plan 8506-L-02 J and the principles described in the Design and Access Statement. Any Reserved Matter application shall include a statement providing an explanation as to how the design of the development responds to the relevant Design and Access Statement.

Reason: In order to secure a well planned development.

- 7) No development above ground floor slab level of phase 3 or any subsequent phase shall take place until samples of the materials to be used in the construction of the external surfaces of the dwellings hereby permitted have been submitted to and approved in writing by the Local Planning Authority (to include those materials to be used externally on the walls and roofs, doors and windows, door and window frames and block work materials on drives/specific crossing points). Development shall be carried out in accordance with the approved details unless otherwise agreed in writing.

Reason: To ensure the satisfactory appearance of the development

- 8) Prior to the commencement of phase 3, unless otherwise agreed by the Local Planning Authority, development, other than that required to be carried out as part of an approved scheme of remediation, must not commence until sections 1 to 4 have been complied with:

1. A preliminary risk assessment (a Phase I desk study) submitted to the Local Authority in support of the application has identified unacceptable risk(s) exist on the site as represented in the Conceptual Site Model. A scheme for detailed site

investigation must be submitted to and approved in writing by the Local Planning Authority prior to being undertaken to address those unacceptable risks identified. The scheme must be designed to assess the nature and extent of any contamination and must be led by the findings of the preliminary risk assessment. The investigation and risk assessment scheme must be compiled by competent persons and must be designed in accordance with DEFRA and the Environment Agency's "Model Procedures for the Management of Contaminated Land, CLR11".

2. The detailed site investigation and risk assessment must be undertaken in accordance with the approved Scheme and a written report of the findings produced. This report must be approved by the Local Planning Authority prior to any development taking place.

3. Where the site investigation identified remediation is required, a detailed remediation scheme to bring the site to a condition suitable for the intended use by removing unacceptable risks to identified receptors must be prepared and is subject to the approval of the Local Planning Authority in advance of undertaking. The remediation scheme must ensure that the site will not qualify as Contaminated Land under Part 2A Environmental Protection Act 1990 in relation to the intended use of the land after remediation.

4. The approved remediation scheme must be carried out in accordance with its terms prior to the commencement of development, other than that required to carry out remediation, unless otherwise agreed in writing by the Local Planning Authority.

5. Following the completion of the measures identified in the approved remediation scheme a validation report that demonstrates the effectiveness of the remediation carried out must be produced, and is subject to the approval of the Local Planning Authority prior to the occupation of any buildings.

6. In the event that contamination is found at any time when carrying out the approved development that was not previously identified it must be reported in writing immediately to the Local Planning Authority. An investigation and risk assessment must be undertaken and where necessary a remediation scheme must be prepared, these will be subject to the approval of the Local Planning Authority. Following the completion of any measures identified in the approved remediation scheme a validation report must be prepared, which is subject to the approval in writing of the Local Planning Authority prior to the occupation of any buildings.

Reason: To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors.

- 9) Prior to the submission of any Reserved Matters for each Development Phase must not commence until sections 1 to 5 have been complied with:

1. A preliminary risk assessment must be carried out. This study shall take the form of a Phase I desk study and site walkover and shall include the identification of previous site uses, potential contaminants that might reasonably be expected given those uses and any other relevant information. The preliminary risk assessment report shall contain a diagrammatical representation (conceptual model) based on the information above and shall include all potential contaminants, sources and receptors to determine whether a site investigation is required and this should be detailed in a report supplied to the Local Planning Authority. The risk assessment must be approved in writing before any development takes place.

2. Where an unacceptable risk is identified a scheme for detailed site investigation must be submitted to and approved in writing by the Local Planning Authority prior to being undertaken. The scheme must be designed to assess the nature and extent of any contamination and must be led by the findings of the preliminary risk assessment. The investigation and risk assessment scheme must be compiled by competent persons and must be designed in accordance with DEFRA and the Environment Agency's "Model Procedures for the Management of Contaminated Land, CLR11".

3. Detailed site investigation and risk assessment must be undertaken and a written report of the findings produced. This report must be approved by the Local Planning Authority prior to any development taking place. The investigation and risk assessment must be undertaken by competent persons and must be conducted in accordance with DEFRA and the Environment Agency's "Model Procedures for the Management of Contaminated Land, CLR11".

4. Where identified as necessary a detailed remediation scheme to bring the site to a condition suitable for the intended use by removing unacceptable risks to identified receptors must be prepared and is subject to the approval of the Local Planning Authority in advance of undertaking. The remediation scheme must ensure that the site will not qualify as Contaminated Land under Part 2A Environmental Protection Act 1990 in relation to the intended use of the land after remediation.

5. The approved remediation scheme must be carried out in accordance with its terms prior to the commencement of development, other than that required to carry out remediation, unless otherwise agreed in writing by the Local Planning Authority.

6. Following the completion of the measures identified in the approved remediation scheme a validation report that demonstrates the effectiveness of the remediation carried out must be produced, and is subject to the approval of the Local Planning Authority prior to the occupation of any buildings.

7. In the event that contamination is found at any time when carrying out the approved development that was not previously identified it must be reported in writing immediately to the Local Planning Authority. An investigation and risk assessment must be undertaken and where necessary a remediation scheme must be prepared, these will be subject to the approval of the Local Planning Authority. Following the completion of any measures identified in the approved remediation scheme a validation report must be prepared, which is subject to the approval in writing of the Local Planning Authority prior to the occupation of any buildings.

Reason: To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors.

- 10) No development shall take place on any development phase until a programme of archaeological work, including a Written Scheme of Investigation, has been submitted to and approved by the local planning authority in writing for that development phase and site investigation has been undertaken and completed. The scheme shall include an assessment of significance and research questions; and:
- a) The programme and methodology of site investigation and recording.
  - b) The programme for post investigation assessment.
  - c) Provision to be made for analysis of the site investigation and recording.
  - d) Provision to be made for publication and dissemination of the analysis and records of the site investigation
  - e) Provision to be made for archive deposition of the analysis and records of the site investigation
  - f) Nomination of a competent person or persons/organisation to undertake the works set out within the Written Scheme of Investigation.

Reason: In accordance with the requirements of paragraph 194 of the National Planning Policy Framework.

- 11) Each development phase shall not be occupied until the site investigation and post investigation assessment for each phase has been completed in accordance with the programme set out in the Written Scheme of Investigation approved under condition (10) and the provision made for analysis, publication and dissemination of results and archive deposition has been secured.

Reason: In accordance with the requirements of paragraph 194 of the National Planning Policy Framework.

- 12) Within 12 months of the commencement of any development phase development hereby approved, the content, design and location of an historic environment interpretation panel shall be submitted to and approved in writing by the Local Planning Authority. Thereafter, the development shall be carried out in accordance with the approved details.

Reason: In accordance with the requirements of paragraph 194 of the National Planning Policy Framework.

- 13) No works or development above foundation level for phase 3 shall take place until a finalised scheme for surface water drainage has been submitted to and approved in writing by the Local Planning Authority. The scheme shall specifically include:-

- Detailed drainage design, showing all private foul and surface water connections,
- A simple index assessment considering the water quality of surface water runoff,
- Consideration of what SuDS features can be incorporated into the site drainage to provide an appropriate level of runoff treatment.
- Full details of the proposed balancing area

This scheme should be indicated on a drainage plan and the approved scheme shall be completed prior to the first use of the full application hereby approved.

Reason: To prevent the risk of flooding and to improve and protect water quality

- 14) No development within a reserved matters phase shall commence until a full scheme for the provision of a Sustainable Urban Drainage System (SuDS) for each phase has been submitted to and approved in writing by the Local Planning Authority. No dwelling shall be occupied in that phase until the SuDS has been constructed in accordance with the approved scheme. Thereafter, the SuDS shall be maintained in accordance with the approved details.

Reason: To ensure that a suitable drainage system is place in order to prevent pollution to controlled waters and achieve recharge to the aquifer underlying the site.

- 15) No dwelling shall be occupied on phase 3 or any subsequent phase until a drainage system to allow for the disposal of foul and surface water sewerage has been completed in accordance with details that shall have first been submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure that a suitable drainage system is place.

- 16) No development within a reserved matters phase until a full engineering design solution providing full specification, extent and methodology details of the cut and fill works to that Phase shall be submitted to and approved in writing by the Local Planning Authority. The specification should clarify how the undisturbed ground at higher levels is to be retained in a stable manner, together with the foundation design at lower levels. The development shall be carried out as approved.

Reason: In order to secure a well-planned development.

- 17) Other than Phase 3, no development within a relevant phase shall take place until there has been submitted to and approved in writing by the Local Planning Authority details of the finished ground floor levels of all the approved buildings and the finished ground levels for all other areas of the site. The sections shall show the development relative to the ground levels adjoining the site. The development shall be carried out in accordance with the approved details.

Reason: To ensure that the development is carried out at suitable levels and in relation to adjoining land and buildings and in the interests of amenity and highway requirements.

- 18) All proposed works shall be carried out in accordance with the recommendations as set out in the following report prepared by FPCR.

- Brockhill East (Phase 3) Ecological Appraisal (FPCR, June 2019)
- Brockhill East (Phase 3) Herpetofauna Survey Report (FPCR, June 2019)
- Brockhill East (Phase 3) Bat Report (FPCR, June 2019)
- Brockhill East (Phase 3) Badger Report (FPCR, June 2019)
- Brockhill East (Phase 3) Bird Report (FPCR, June 2019).

Reason: To ensure that the proposal results in a net gain of biodiversity.

- 19) Notwithstanding the submitted details, no development within a reserved matters phase shall commence until a Construction Ecological Management Plan (CEcMP) for each phase has been submitted to and approved in writing by the local planning authority. The CEcMP shall include, but not limited to the following no works shall take place until a Construction Ecological Management Plan (CEcMP) has been submitted to and approved in writing by the local planning authority. The CEcMP shall include, but not limited to the following:

- i. Risk assessment of potentially damaging construction activities
- ii. Identification of "biodiversity protection zones"
- iii. Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction (may be provided as a set of method statements)
- iv. The locations and timing of sensitive works to avoid harm to biodiversity features (e.g. daylight working hours only starting one hour after sunrise and ceasing one hour after sunset)
- v. The times during construction when ecological or environmental specialists need to be present on site to oversee works
- vi. Responsible persons and lines of communication
- vii. The role and responsibilities on site of an ecological clerk of works (ECoW) or similar person
- viii. Use of protective fences, exclusion barriers and warning signs
- ix. Ongoing monitoring, including compliance checks by a competent person(s) during construction and immediately post-completion of construction works

The approved CEcMP shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details.

Reason: To prevent pollution of the water environment and to ensure that the proposal results in a net gain of biodiversity.

- 20) Notwithstanding the submitted details, no development within a reserved matters phase shall commence until a Landscape and Ecological Management Plan (LEcMP) for each phase has been submitted to, and be approved in writing by, the local planning authority.

The content of the LEcMP shall include, but not limited to the following:

- a) Description and evaluation of features to be managed.
- b) Ecological trends and constraints on site that might influence management.
- c) Aims and objectives of management including those in relation to dormice and bats.
- d) Appropriate management options for achieving aims and objectives including appropriate enhancement measures.
- e) Prescriptions for management actions.
- f) Preparation of a work schedule (including an annual work plan capable of being rolled forward over a five-year period).
- g) Details of the body or organisation responsible for implementation of the plan.
- h) Legal and funding mechanism(s) by which the long-term implementation of the plan will be secured by the developer.
- i) Ongoing monitoring and remedial measures.

The plan shall also set out (where the results from monitoring show that conservation aims and objectives of the LEcMP are not being met) how contingencies and/or remedial action will be identified, agreed and implemented so that the development still delivers the fully functioning biodiversity objectives of the originally approved scheme. The approved plan will be implemented in accordance with the approved details.

Reason: To safeguard Biodiversity as set out by Wildlife and Countryside Act 1981 (as amended), Natural Environment and Rural Communities Act 2006 and the NPPF.

21) Notwithstanding the submitted details, no development within any phase shall be occupied until details of external lighting for each phase have been submitted to and approved in writing by the Local Planning Authority. The details shall clearly demonstrate that lighting will not cause excessive light pollution or disturb or prevent bat species using key corridors, forage habitat features or accessing roost sites. The details shall include, but not limited to, the following:

- i. A drawing showing sensitive areas and/or dark corridor safeguarding areas
- ii. Description, design or specification of external lighting to be installed including shields, cowls or blinds where appropriate.
- iii. A description of the luminosity of lights and their light colour
- iv. A drawing(s) showing the location and where appropriate the elevation of the light fixings.
- v. Methods to control lighting control (e.g timer operation, passive infrared sensor (PIR)).

All external lighting shall be installed in accordance with the specifications and locations set out in the approved details. These shall be maintained thereafter in accordance with these details. Under no circumstances shall any other external lighting be installed.

Reason: To safeguard the site from increased light pollution, visual amenity and maintain the existing value of biodiversity on and adjacent to the site to protect foraging/commuting bats in accordance with the Conservation of Habitats and Species Regulations 2017, the Wildlife and Countryside Act 1981 (as amended), Circular 06/2005 and the National Planning Policy Framework.

22) A landscape management plan, including long term design objectives, a schedule of phased construction, management responsibilities and maintenance schedules for all landscape areas, both hard (such as details shall include proposed finished levels or contours, car parking layouts, other vehicle and pedestrian footpaths/access and circulation areas, hard surface materials) and soft (other than small, privately owned, domestic gardens) shall be submitted to and approved in writing by the Local Planning Authority prior to the occupation of each phase of the development. The landscape management plan shall be carried out as approved. The method statements shall include:

- a. purpose and objectives for the proposed works;
- b. detailed designs and working methods necessary to achieve the stated objectives;
- c. extent and location of proposed works shown on appropriate scale maps;
- d. timetable for implementation;
- e. persons responsible for implementing the works; and
- f. initial aftercare and long-term maintenance.

Reason: In order to protect the trees, hedges and landscaping features which form an important part of the amenity of the site and in order to secure a well-planned development.

- 23) No development within a relevant phase shall commence until full details of retained and new soft landscape works have been submitted to and approved in writing by the Local Planning Authority. Such approved planting shall be completed in the first planting season post occupation of the first dwelling within the relevant phase. The planting schedule shall include all those trees, hedgerows, shrubs or existing features of the land to be retained, removed and/or treated, new planting plans; written specifications (including cultivation and other operations associated with plant and grass establishment); schedules of plants, noting species, plant sizes and proposed numbers/densities where appropriate; implementation programme.

All such planting shall be maintained to encourage its establishment for a minimum of five years following contractual practical completion of the development. Any trees or significant areas of planting which are removed, die or become, in the opinion of the Local Planning Authority, seriously damaged or defective within this period, shall be replaced as soon as is reasonably practicable with others of species, size and number as originally approved, unless the Local Planning Authority gives its written consent to any variation.

Reason: In order to secure a well-planned development.

- 24) No development within a reserved matters phase shall commence until full details of all proposed hard surface areas have been submitted to and approved in writing by the Local Planning Authority. Such details shall include proposed finished levels or contours, car parking layouts, other vehicle and pedestrian footpaths/access and circulation areas, hard surface materials. Development shall be carried out in accordance with the approved details. The approved hard landscaping plan shall be implemented within two years from the date post occupation of the first dwelling within the relevant phase.

Reason: In order to secure a well-planned development.

- 25) Full details of the layout of the public open space areas, including details of planting specification and schedules, surfacing, enclosures, play equipment, seating and the future management and maintenance of the site to allow public access, shall be submitted to and approved in writing by the Local Planning Authority. The public open space shall be implemented in accordance with the agreed details.

Reason: In the interests of visual and neighbouring amenity and the adequate provision of public open space.

- 26) All trees and hedges that are to be retained should be afforded protection in accordance with BS5837:2012 recommendations and as defined within Arboricultural Assessment by FPCR provided with the application throughout any demolition, ground or development work on the site.

Reason: To ensure the environment of the development is improved and enhanced.

- 27) Prior to the commencement of the development on each reserved matters phase, an Arboricultural Method Statement and Tree Protection Plan for each phase of development shall be submitted to and approved in writing by the Local Planning Authority. At all times until the completion of each of the phases of development, such fencing and protection measures shall be retained as approved. Within all fenced areas, soil levels shall remain unaltered and the land kept free of vehicles, plant, materials and debris.

Reason: To ensure the environment of the development is improved and enhanced.

- 28) Prior to the commencement of any reserved matters phase, details of the mix of type and size of market dwellings to be provided in that phase, shall be submitted to and approved in writing by the local planning authority. Development shall be carried out in accordance with the approved details.

Reason: To ensure the creation of a mixed and vibrant community.

- 29) Plans and particulars of the Reserved Matters referred to in Condition 2 shall include a plan identifying the number and location of the affordable housing units to be provided within each relevant phase. The plan shall confirm the size (bedroom numbers), type and tenure of each affordable housing unit. The development shall be carried out in accordance with the approved details.

Reason: To enable the Local Planning Authority to regulate and control the development of the land and to ensure the adequate provision of affordable housing.

- 30) Prior to the commencement of any reserved matters phase until there has been submitted to and approved in writing by the Local Planning Authority a plan indicating the positions, design, materials and type of boundary treatments to be erected. Boundary treatments shall be completed in accordance with the approved details and prior to the occupation of the dwelling to which the boundary relates.

Reason: In order to secure a well-planned development.

- 31) Prior to the commencement of any reserved matters phase details of the facilities for the storage of refuse to be provided in that phase. No individual dwelling shall be occupied until the approved refuse storage facilities to serve that dwelling have been constructed in accordance with approved details.

Reason: To ensure the proposed dwellings have adequate refuse storage facilities and that such facilities ensure that the Local Authority refuse bins do not detract from the character and appearance of the development through failure to provide a space for their storage between collections.

- 32) No development above ground floor slab level of phase 3 shall take place until a scheme of glazing, ventilation (passive and mechanical) and acoustic barrier products/fencing to be installed has been submitted to and approved in writing by the Local Planning Authority to confirm that the dwellings will meet the required sound reduction specification in order to achieve the BS8233:2014 recommended internal and external noise level.

Reason: To protect the amenity of future occupiers

- 33) Prior to the commencement of each phase of the development, details for the installation of fixed telecommunication infrastructure and High Speed Broadband shall be submitted to and approved in writing by the Local Planning Authority. Details shall include connections to multi-point destinations and all residential and commercial buildings to provide sufficient capacity, including duct sizing, to cater for all future phases of the development with sufficient flexibility to meet the needs of existing and future residents. The infrastructure shall be laid out in accordance with the approved details for each phase and at the same time as other services during the construction process. High Speed Fibre Optic Broadband shall be installed into the buildings before they are occupied.

Reason: To ensure that the needs of future residents to connect to the internet does not necessarily entail engineering works to an otherwise finished and high quality living environment in accordance with Policy 29.

- 34) No more than 85 dwellings hereby approved shall be brought into use until the highway improvements to the Weights Lane corridor as shown in the PJA Drawing Ref: 02809 TR 03 Rev P6, or similar scheme acceptable to the Highway Authority, has been approved in writing and completed to the satisfaction of the Local Planning Authority (in consultation with the Local Highway Authority) and is open to traffic. The scheme is to include a continuous footway along the south side of the Weights Lane carriageway between the development site and connecting to existing footways running alongside the A441 Birmingham Road carriageway, by tying into the consented Brockhill Phase 4 footway proposals.

Reason: To ensure the safe and free flow of traffic onto the highway.

- 35) No more than 128 dwellings hereby approved shall be brought into use until the highway improvements to the Dagnell End Road / A441 Birmingham Road junction as shown in the PJA Drawing Ref: 2809 P 12 Rev P4, or similar scheme acceptable to the Highway Authority, has been approved in writing and completed to the satisfaction of the Local Planning Authority (in consultation with the Local Highway Authority) and is open to traffic. The junction is to include Microprocessor Optimised Vehicle Actuation (MOVA) signal control.

Reason: To ensure the safe and free flow of traffic onto the highway.

- 36) No dwelling in a relevant phase shall be first occupied until that dwelling has been fitted with an electric vehicle charging point. The charging points shall comply with BS EN 62196 Mode 3 or 4 charging and BS EN 61851 and the Worcestershire County Council Streetscape Design Guide. The electric vehicle charging points shall be retained for the lifetime of the development unless they need to be replaced in which case the replacement charging point(s) shall be of the same specification or a higher specification in terms of charging performance.

Reason: To encourage sustainable travel and healthy communities.

- 37) No relevant phase shall be first occupied until details of sheltered and secure cycle parking to comply with the Council's adopted highway design guide has been provided in accordance with details which shall first be submitted to and approved in writing by the Local Planning Authority. Thereafter the approved cycle parking shall be kept available for the parking of bicycles only.

Reason: To comply with the Council's parking standards and to encourage sustainable travel and healthy communities.

- 38) The Residential Travel Plan hereby approved shall be implemented in accordance with the regime contained within the Plan. Monitoring must also include vehicle counts on years 1,3 and 5 (minimum). In the event of failing to meet the targets within the Plan a revised Plan shall be submitted to and approved in writing by the Local Planning Authority to address any shortfalls, and where necessary make provision for and promote improved sustainable forms of access to and from the site. The Plan thereafter shall be implemented and updated in agreement with the Local Planning Authority and thereafter implemented as amended.

Reason: To reduce vehicle movements and promote sustainable access.

- 39) No demolition works nor development within a development phase shall commence on site until a Construction Environmental Management Plan (CEMP) has been submitted to, and approved in writing by, the Local Planning Authority. This shall deal with the treatment of any environmentally sensitive areas, their aftercare and maintenance as well as a plan detailing the works to be carried out showing how the environment will be protected during the works. Thereafter all works for that Development Phase shall be carried out in accordance with the approved Statement throughout the construction period.

The CEMP shall provide for the following where relevant:

- I. The parking of vehicles of site operatives and visitors
- II. Loading and unloading of plant and materials (including times)
- III. Storage of plant and materials used in constructing the development
- IV. Measures to control the deposition of mud onto the local road network.
- V. Measures to control the emission of dust and dirt during construction
- VI. Measures to control noise and vibration during construction
- VII. Details of any temporary construction accesses and their reinstatement.
- VIII. Details of any changes to construction vehicle routing and site management following the Weights Lane connection to the site being made.
- IX. A highway condition survey, timescale for re-inspections, and details of any reinstatement.
- X. Locations and measures to control the emissions where in situ bioremediation or soil washing takes place.
- XI. Hours of operation and working
- XII. The timing of the works
- XIII. The measures to be used during the development in order to minimise environmental impact of the works, considering both potential disturbance and pollution
- XIV. Any necessary pollution protection methods
- XV. Information on the persons/bodies responsible for particular activities associated with the method statement that demonstrates they are qualified for the activity they are undertaking.

The measures set out in the approved plan shall be carried out and complied with in full during the construction of the development hereby approved. Site operatives' parking, material storage and the positioning of operatives' facilities shall only take place on the site in locations approved by in writing by the local planning authority.

Reason: In order that the Local Planning Authority can properly consider the effect of the works on the amenity of the locality and to ensure the provision of adequate on-site facilities and in the interests of highway safety. This is a pre-commencement condition and is necessary to protect residential amenity.

Members of the Planning Committee met on the 27th January 2021 and considered the main published report an update report, second update report 27.01.21 and resolved to grant planning permission subject to a legal agreement, as per the officer recommendation.

### **Conclusions**

The Brockhill site is a strategic mixed-use allocation in Redditch Borough and Bromsgrove District, located on the northwest edge of Redditch. It is a long standing strategic site that was previously designated as a combination Area of Development Restraint (ADR), Green Belt and an employment site (under IN67), this is taken forward through Policy 46 in the adopted Redditch local plan for around 1,025 dwellings and other supporting uses. It is also allocated through policy RBCD.1 of the adopted Bromsgrove District Plan for approximately 600 dwellings. As part of the plan-making process supporting the BDP, Bromsgrove District Council agreed through the Duty to Cooperate to assist Redditch Borough Council in delivering its housing target. This planning application sees policy RBCD.1 and the remaining allocation under Policy 46 being realised, with up to 960 homes making a substantial contribution towards meeting the housing needs of Redditch.

The application should therefore be approved to both help the Government's goal of significantly boosting the supply of housing, and to assist Redditch Borough Council in delivering the homes needed to support its adopted plan and assist towards its future supply of housing land.

In conclusion, and having regard to the NPPF, BoRLP and all other material considerations that have become evident through consideration of this application, it is concluded that the limited harm identified does not significantly and demonstrably outweigh the benefits, as set

out in terms of the presumption in favour of sustainable development test in paragraph 11 of the Framework. It is the benefits of the scheme that significantly and demonstrably outweigh the harm, such that it is concluded that the development should be permitted in line with the adopted Local Plan and National Planning Policy Framework.

Account of all the matters raised in the representations has been taken. The Government is seeking to boost significantly the supply of housing. Neither Council presently has a five-year housing land supply. This sustainable proposal would provide additional housing in an area where there is an identified shortage. The benefits of the proposals clearly outweigh the harm.

The officers report to committee, update reports and minutes are available to view on the Council's website:

## **Informatives**

- 1) In dealing with this application the local planning authority have worked with the applicant in a positive and proactive manner, seeking solutions to problems arising from the application in accordance with the NPPF and Article 35 of the Town and Country Planning (Development Management Procedure) (England) Order 2015. The authority has helped the applicant resolve technical issues.
- 2) A Legal Agreement forms part of this planning permission.
- 3) Highways Informatives

### **Section 278 Agreement**

The granting of this planning permission does not remove any obligations on the applicant to undertake a technical design check of the proposed highway works with the Highway Authority, nor does it confirm acceptance of the proposal by the Highway Authority until that design check process has been concluded. Upon the satisfactory completion of the technical check the design would be suitable to allow conditions imposed under this permission to be discharged but works to the public highway cannot take place until a legal agreement under Section 278 of the Highways Act 1980 has been entered into and the applicant has complied with the requirements of the Traffic Management Act 2004.

The applicant is urged to engage with the Highway Authority as early as possible to ensure that the approval process is started in a timely manner to achieve delivery of the highway works in accordance with the above mentioned conditions.

The applicant should be aware of the term "highway works" being inclusive of, but not limited to, the proposed junction arrangement, street lighting, structures and any necessary traffic regulation orders.

### **Drainage Details for Section 38**

It is not known if the proposed roadworks can be satisfactorily drained to an adequate outfall. Unless adequate storm water disposal arrangements can be provided, the County Council, as Highway Authority, will be unable to adopt the proposed roadworks as public highways.

The applicant is, therefore, advised to submit the engineering details referred to in this conditional approval to the County Council's County Network Control Manager, Worcestershire County Council, County Hall, Spetchley Road, Worcester, WR5 2NP at an early date to enable surface water disposal arrangements to be assessed.

#### No Drainage to Discharge to Highway

Drainage arrangements shall be provided to ensure that surface water from the driveway and/or vehicular turning area does not discharge onto the public highway. No drainage or effluent from the proposed development shall be allowed to discharge into any highway drain or over any part of the public highway.

#### Protection of Visibility Splays

The applicant's attention is drawn to the need to ensure that the provision of the visibility splay(s) required by this consent is safeguarded in any sale of the application site or part(s) thereof.

#### Extraordinary Maintenance

The attention of the applicant is drawn to Section 59 of the Highways Act 1980 which allows the Highway Authority to recover additional costs of road maintenance due to damage by extraordinary traffic.

Before any work is commenced upon the development hereby approved representatives of Worcestershire County Council, as the Highway Authority and the applicant, shall carry out a joint road survey/inspection on the roads leading to this site. Any highlighted defects shall be rectified to the specification and satisfaction of the Highway Authority before work is commenced on the development hereby approved. A further joint survey/inspection shall be undertaken following completion of development hereby approved and any necessary remedial works shall be completed to the specification and satisfaction of the Highway Authority within 1 month or other agreed timescale.

#### Works Adjoining Highway

Any work involving the removal or disturbance of ground or structures supporting or abutting the publicly maintained highway should be carried out in accordance with details to be submitted to and approved in writing by the Highway Authority.

#### Temporary Direction Signs to Housing Developments

This consent does not authorise the erection of temporary direction signs on the public highway. Should the applicant wish to direct traffic to the development site they should seek the consent of the Highway Authority. All temporary directional sign proposals should be submitted to the Network Control Manager, Worcestershire County Council, County Hall, Spetchley Road, Worcester, WR5 2NP. No signs should be erected without the consent of the Highway Authority.

#### Construction Environmental Management Plan (CEMP)

It is expected that contractors are registered with the Considerate Constructors scheme and comply with the code of conduct in full, but particular reference is made to "respecting the community" this says:

Constructors should give up most consideration to their impact on neighbours and the public

- o Informing, respecting and showing courtesy to those affected by the work.
- o Minimising the impact of deliveries, parking and work on the public highway.
- o Contributing to and supporting the local community and economy.

- o Working to create a positive and enduring impression and promoting the Code.

The CEMP should clearly identify how the principle contractor will engage with the local community, this should be tailored to local circumstances. Contractors should also confirm how they will manage any local concerns and complaints and provide an agreed Service Level Agreement for responding to said issues.

Contractors should ensure that courtesy boards are provided, and information shared with the local community relating to the timing of operations and contact details for a site coordinator in the event of any difficulties.

This does not offer any relief to obligations under existing Legislation.

## **For your information**

### **Appealing the Decision**

If you feel that the conditions are not acceptable you can appeal to the Secretary of State through the Planning Inspectorate. This appeal should be made by 1<sup>st</sup> May 2022 unless supported by special circumstances. The appropriate form and further information on how to appeal can be found at <http://www.planningportal.co.uk/planning/appeals/planningappeals> or by contacting the planning Inspectorate Customer Services Team on 0303 444 5000. If you want a planning appeal to follow the inquiry procedure you should notify the Local Planning Authority and also the Planning Inspectorate at least 10 working days before submitting your planning appeal.

### **Purchase Notices**

If Redditch Borough Council or the Secretary of State has refused planning permission or granted it conditionally, the landowner may claim that the land is incapable of reasonable beneficial use, and for this reason may serve the Council a purchase notice requiring them to purchase the land. In certain circumstances, a claim may be made against Redditch Borough Council for compensation. Further information about purchase notices can be found at: <http://www.legislation.gov.uk/ukpga/1990/8/part/VI>
