

## Appendix 1 – Action Plan

The Action Plan below sets out the actions that specifically relate to preventing and relieving homelessness, however, in recognition of the Government’s commitment to build 1.5 million homes backed by £39 billion investment, and consistent with the national homelessness strategy and wider housing policy, the local authorities recognise that local prevention efforts must be supported by sufficient affordable housing and effective allocation of social stock. Without this, demand for crisis interventions and temporary accommodation will continue to rise. The councils will ensure alignment with the Worcestershire Housing Strategy in order to support the increase in the supply of new affordable and high-quality homes and to address the need for greater diversity in the housing stock through the development of the supported housing strategy. Performance against delivery of new build housing is monitored through the Worcestershire Housing Board.
